

Arian Niakan

AI engineer and game designer with a background in Electrical Engineering and Cognitive Neuroscience research.

Istanbul, Turkey — Game Design MA @ Bahçeşehir University — formerly Electrical Engineering @ University of Tehran

01 Work — AI Engineering

Agentic PR Reviewer github.com/arianniakan/Agentic-PR-reviewer

AI code review agent for GitHub PRs.

LLM agent with two tools: posts review comments for standard issues, or pages Slack directly for critical vulnerabilities (hardcoded secrets, injection, RCE). Streams live via a hand-rolled NDJSON protocol; locked in with an 8-fixture eval harness passing 8/8.

Next.js · Vercel AI SDK · Octokit · Slack API

Knowledge App knowledge-app-vert.vercel.app

RAG chat app with citations.

Retrieval-augmented chat over PDFs, websites, and YouTube — reranked retrieval, per-user namespacing, GitHub OAuth, rate limiting, automatic inactive-data cleanup. Eval harness scores 100% retrieval hit-rate and 100% answer correctness on the demo set.

Next.js · Pinecone · Upstash Redis · Auth.js

Steam Reviews Qualitative Coding Tool steam-review-coding-tool.vercel.app

Qualitative coding tool for Steam reviews with AI-assisted tagging.

AI code suggestions constrained to a researcher's codebook via structured outputs; human-in-the-loop acceptance; agreement with human coders measured via Cohen's kappa. Local-first architecture — Postgres-in-WebAssembly, no server-side database.

Next.js · PGlite · OpenAI Structured Outputs

02 Game Design

Master's in Game Design Oct 2025 - Present **Bahçeşehir University, Istanbul**

Yes, Boss! wild-hair-pirates.itch.io/yes-boss
Rogue-lite about surviving corporate life, built solo for a game jam. PICO-8 / Lua.

Froggy Cafe
Deduction game with a procedural puzzle generator and branching narrative. Course project — LÖVE / Lua.

Game Designer, Volunteer Jul - Dec 2021
Gameln
Designed an online competition game simulating an industrial production economy.

03 Background

Time Perception Research Assistant
Univ. of Tehran — NBIC Institute · 2023–2025

EEG/behavioral data; built a Raspberry Pi stimulus-delivery device for timing experiments.

Hardware Security & Encryption Researcher
Univ. of Tehran · 2023–2024

FPGA Engineer — Custom RISC-V (SAYAC)
Univ. of Tehran · 2022–2023
FPGA implementation for prototyping and side-channel security testing.

Hardware Design Engineering Intern
CROUSE PJS Co. · Aug–Sep 2022

Data Science Team Member
Quera · Jun–Sep 2024
Teaching Assistant
Univ. of Tehran — Digital Systems & Computer Architecture

04 Skills & Education

AI & FULLSTACK
Next.js, React, TypeScript, Vercel AI SDK, RAG/evals, Python (TensorFlow, PyTorch)

GAME DEVELOPMENT
Unity (C#), Godot, LÖVE & PICO-8 (Lua)

HARDWARE & EMBEDDED
Verilog/VHDL/SystemC, FPGA (Altera, Xilinx Zynq), C/C++

AI-ASSISTED WORKFLOW
GitHub Copilot, Claude Code, Gemini, GPT

EDUCATION
MA Game Design, Bahçeşehir University (2025–present)
BSc Electrical Engineering, University of Tehran (2019–2024)

LANGUAGES
Persian (native) · English (fluent, TOEFL 114) · French (beginner)

🏅 **Silver medal**, Domestic Olympiad on Astronomy & Astrophysics — Iran's National Elites Foundation
